### Master's Thesis with Disputation

Those who have successfully completed the first and second stages of their studies (semester 1-3) are eligible to undertake a master's thesis with disputation. The master's Thesis must be registered, stating the German and English titles, and must be submitted in English no earlier than three months and no later than six months after the topic has been assigned. This includes the experimental treatment of a theme with scientific methods and a disputation of 30 minutes.

In justified exceptional cases, deadline of master's thesis can be extended by a further three months upon application to the master's commission. Exceptional circumstances include, in particular, periods of absence due to illness, which must be proven by a medical certificate, or delays in the experimental part of the master's Thesis which are not the fault of the student. Otherwise, the examination will be assessed as not having been passed!

The master's thesis with disputation will be assessed by two Examiners appointed by the Master's Commission.

**\*Examiners/S and students agree with signature that title of master's thesis, name of graduate and supervisor/supervising institution are named on TiHo homepage.**
