Shar-Pei research

Information about the owner			
Last name:		First name:	
Address:			
Phone (landline):		Phone (cellphone):	
Email:			
Information about the dog (incl. pedigree-information)			
Name and kennel name:			
Sex:	Male Neutered	Female	Date of birth: Purebred: Yes No
Kennel club:			
Registered no. dog :		Chip-/Tattoo no. dog	
Registered no. sire :		Chip-/Tattoo no. sire :	
Registered no. dam :		Chip-/Tattoo no. dam :	
<i>Note: Information regarding kennel club and registration numbers are only used for internal identification and are not included in the evaluation.</i>			
Status of the dog			
Status	Alive	Euthanasia Natural death	Date of death:
In case of examination at a veterinary pathological institute: Please add the report!	Yes	No	
Amyloid-positive results (congo red stain) in the following organs	Kidney Other organ(s):	Liver Pancreas	Spleen

Type of the dog			
Please use the instructions for questions regarding wrinkles.			
Breed type	Bone-mouth	Tweener	Meat-mouth
Overall skin wrinkling	Little	Intermediate	Many
Wrinkles in body region	Little	Intermediate	Many
Wrinkles in head region	Little	Intermediate	Many
Wrinkles on the legs	Little	Intermediate	Many
Coat type	Horse coat	Brush coat	Bear coat

Health status of the dog

Frequency of occurrence of clinical sign per year of life

Age in years	<1				1-2				3-4				5-6				7-8				9-10				>10			
Frequency	1x	2x	3x	>3x	1x	2x	3x	>3x	1x	2x	3x	>3x	1x	2x	3x	>3x	1x	2x	3x	>3x	1x	2x	3x	>3x	1x	2x	3x	>3x
A: Fever of <u>unknown</u> origin																												
B: Fever of <u>known</u> origin																												
Swollen joints (joint inflammation, arthritis)																												
Swelling of the muzzle																												
Ear inflammation (Otitis) (recurrent or persistent)																												
Eye inflammation* (recurrent or persistent)																												
Blister-like skin alterations																												
Reddening of the skin																												
Thickened skin regions (pasty consistency)																												
Diarrhea/Vomiting of unknown origin																												
Ad B: Please state the potential reason(s) for fever:																												

Connection between specific factors and the disease

Occurrence of fever and/or aforementioned inflammations after/during the following factors:	Dog in heat	1x	2x	3x	>3x
	Weather (severe heat or cold)	1x	2x	3x	>3x
	Traveling	1x	2x	3x	>3x
	Other factor(s):	1x	2x	3x	>3x

*** Regarding eye inflammation:**

Reddening of the conjunctivas or the surrounding soft tissue, swelling of the eyelids, increased discharge from the eye (mucus, pus or excessive tearing), pain or itching (identifiable e.g. by excessive blinking, squinting of the eyelids, rubbing with the paw).

Please do not include signs of eye inflammation that have stopped occurring after Entropium surgery.

Other diseases

Kidney disease <i>Please specify clinical signs and add laboratory results!</i>	Elevated SDMA level Elevated creatinine level Excessive thirst/urination Nausea/Vomiting Oral ulcers (severe lesions of mucous membrane) Other clinical signs associated with kidney diseases: Diagnosed on:
Liver disease <i>Please specify clinical signs and add laboratory results!</i>	Elevated levels of liver parameters Distended abdomen Vomiting Diarrhea Obstipation Other clinical signs associated with liver diseases: Diagnosed on:
Tumor(s) of the skin	Yes No Kind of tumor(s): Localisation of tumor(s): Diagnosed on:
Does your dog suffer from any other known diseases ? If yes, which?	Yes No Name of the disease: Diagnosed on:

Fever episodes					
The following questions refer to „A: Fever of <u>unknown</u> origin“					
Duration of fever episode(s)					
1. Fever episode	<12h	12-24h	24-48h	48-72h	>72h
2. Fever episode	<12h	12-24h	24-48h	48-72h	>72h
3. Fever episode	<12h	12-24h	24-48h	48-72h	>72h
4. Fever episode	<12h	12-24h	24-48h	48-72h	>72h
Have you/Has your veterinarian measured the body temperature of your dog?	Yes	No			
Body temperature within fever episode(s) (in Celsius)					
1. Fever episode	38-39 °C	39-40 °C	40-41 °C	>41 °C	
2. Fever episode	38-39 °C	39-40 °C	40-41 °C	>41 °C	
3. Fever episode	38-39 °C	39-40 °C	40-41 °C	>41 °C	
4. Fever episode	38-39 °C	39-40 °C	40-41 °C	>41 °C	
Has your dog received any medication due to its fever episode(s)?	Yes	No			
Kind of medication: <i>Please add the report of your veterinarian!</i>	Metacam Novalgine Other:	Rimadyl Prednisolon		Antibiotics	
Side effects of medication received due to fever and/or pain:	Vomiting				
	Vomiting of blood				
	Diarrhea				
	Blood in stool				
	Increased drinking				
	Loss of appetite				
	Increased panting				
	Poor hair coat				
	Different behaviour (lethargy, aggression)				
Other side effect(s):					
How many times have you presented your dog at the vet due to the following clinical signs?	Amount of presentations at the vet:				
Fever	1x	2x	3x	>3x	
Pruritus/Skin disease	1x	2x	3x	>3x	
Diarrhea	1x	2x	3x	>3x	
Vomiting	1x	2x	3x	>3x	
Lameness	1x	2x	3x	>3x	
Pain	1x	2x	3x	>3x	
You may add information regarding further fever episodes on an extra page.					

The owner's declaration of agreement		
A scientific use of some of the results and remains of blood samples is included by this investigation. All data will be made anonymous and thus the ID of the dog or the owner of the dog cannot be inferred. Herewith, I agree on the anonymous use of the scientific data.		
Date		Signature of the owner
